

# DO YOU HAVE FIBROMYALGIA?

**SDSU Researchers are recruiting adults ages 18-65  
for a Chronic Pain and Brain Study**

The study will examine the impact of chronic fibromyalgia on cognitive and neural functions

## Looking for Participants who:

1. Have been diagnosed with **fibromyalgia** and have been experiencing widespread pain for 3 months or longer,  
OR
  2. Have no history of a chronic pain condition, or any episodes of pain in the past year that have limited daily activities, or required pain medication
- Qualified participants will be interviewed (~15 min) and will be asked to complete a battery of questionnaires (up to 40 min). They will take part in an electroencephalography (EEG) recording (~1.5 hrs) and a magnetic resonance (MRI) scanning session at SDSU (~1.5 hrs).
  - Participants will receive 25\$/hr for participating in the study.
  - Participants must be 18 - 65 yrs old, right-handed, able to have an MRI. Women who wish to participate cannot be pregnant or lactating.
